01 PROFILE

Software engineer and final-year Information Technologies student with six months of product experience at FootballPathX and a portfolio spanning full-stack web systems and data-driven applications. Comfortable tracing problems across UI, APIs and data layers, with hands-on work in React/TypeScript, Node/Fastify, .NET/C#, BigQuery and Python-based analytics.

02 EXPERIENCE

Software Developer Intern — FootballPathX Dec 2025 - May 2026

React · TypeScript · Node.js/Fastify · Firebase/Firestore · BigQuery · RediSearch

- Built and refined admin-facing features across clubs, matches, reporting, search and internal data workflows in an established football-tech product.
- Implemented BigQuery analytics/data-processing, match sorting/filtering and PDF reporting while debugging integrations across the interface, APIs and data layer.
- Alongside development work, contributed to QA/testing by reproducing defects, testing new and existing functionality, checking API responses and data flows, and verifying search, filtering and reporting behaviour.

Web Development Intern — FabLab Sarajevo 2023

PHP · HTML · CSS

- Maintained multilingual web content, adjusted layout/navigation/images, and resolved smaller frontend and script issues affecting presentation and usability.

03 SELECTED PROJECTS

HoopsLab — NBA Analytics Platform FLAGSHIP

.NET / C# · Python · scikit-learn · Data pipelines · REST API

- Built a historical NBA analytics platform spanning 47 seasons (1979-80 to 2025-26), 20,526 player-seasons and 3,818 unique players, with Player Explorer, percentile comparison, Team Builder and Shot Lab workflows.
- Connected a .NET web/API layer with Python modeling and simulation pipelines for production inference and calibrated single-game simulation research.

Case study · GitHub

MovieShop — Full-Stack Movie Commerce PERSONAL PROJECT

ASP.NET Core · EF Core · SQL Server · Angular · TypeScript · JWT · CQRS · PayPal

- Built a full-stack movie commerce application with authentication, reviews, favourites, persistent cart, profiles, notifications and PayPal Sandbox checkout.
- Implemented ASP.NET Core/EF Core API modules with validation and documentation, plus Angular admin CRUD workflows, reactive forms and service integration.

Case study

04 EDUCATION

Faculty of Information Technologies, University "Džemal Bijedić" in Mostar Final year

Bachelor studies in Information Technologies

05 TECHNICAL SKILLS

BACKEND C#, .NET / ASP.NET Core, Node.js, Fastify, REST APIs
FRONTEND React, TypeScript, Angular, JavaScript, HTML/CSS
DATA / ML SQL, SQL Server, PostgreSQL, Firebase/Firestore, BigQuery, Python, scikit-learn
TOOLS Git/GitHub, Swagger/OpenAPI, Visual Studio, WebStorm
LANGUAGES Bosnian — Native · English — B2 (Upper-Intermediate)
